HOME BOOKSHELF SPEAKER WITH PROFESSIONAL STUDIO DNA TRACE

These speakers are designed for hi-fi home stereo systems, wherever it is not possible to use larger floorstanders, or in audio systems in additional rooms of an demanding user.

The applied construction and technological solutions have been taken from professional studio monitors. The design ensures both natural and precise sound reproduction and its new styling inspires confidence with its professional connotations.

BEAUTIFUL FINISH WITH WOODDEN LIKE STRUCTURE

The sleek and uniform-looking cabinet is constructed using thick MDF panels covered with high-quality Walnut or Smoked Oak vinyl.

The cabinet can be placed on anti-slip rubber pads. The aluminum Wilson logo emblem on the grille is brass or silver, depending on the color version of the cabinet.

COMFORTABLE AND NICE LOOKING UNIQUE ROUND GRILLES

Color also depends on the finish of the cabinet - black acoustically transparent material for black speakers, and dark beige, falling into the aged brass for walnut speakers. In addition, the small size of the grilles makes them easy to store when not in use, which usually with traditional designs can be troublesome for users.

CLASSY AND HIGH-QUALITY DETAILS

The aforementioned aluminum panel was anodized in black, giving a brushed metal effect, thus becoming an integral part of the speakers' design. Already at first glance, the whole column reassures the user about the high quality of materials used and the manufacturer's attention to detail.

Cabinet: Walnut with wood texture
Grille: Beige
EAN: 5902602874087

Cabinet: Black with wood texture
Grille: black
EAN: 5902602874070

CONSTRUCTION AND FINISHES

CHARACTERISTIC, TWEETER SURROUNDING, LARGE FIBERGLASS HORN

28 mm soft dome tweeters are deeply embedded in a large 5-inch fiberglass horn, evenly distributing the sound. A powerful neodymium magnet is used in the driver design.

The whole creates an acoustic solution proven in the best studios. The acoustic system is also created by individual 5-inch mid-bass drivers, whose baskets are made of cast aluminum.

DRIVERS WITH EMBOSSED MEMBRANES AND NEODYMIUM MAGNETS

The Kevlar membranes are embossed on the surface, which further strengthens the rigidity of the structure. Large and massive magnets weighing over 280g have been used in their construction.

BACK FIRING BASS REFLEX PORT

Bass-reflex port with rounded outlet ends is located at the back of the cabinet above the terminal section.

CONVENIENT AND SECURE WIRE CONNECTIONS

At the rear of the cabinet, in its lower part, there is an aluminum panel with single cable terminals with a gold-plated contact surface set in front.

Terminals with large, transparent nuts with polarity markings make it easy to attach both unterminated and pre-terminated banana or pitchfork type speaker cables.

AFFORDABLE QUALITY SPEAKERS

Wilson Studio 3 loudspeakers are a very good choice for audio enthusiasts who want to experience their recordings in a way that is natural and intended by the producer and artist. Excellent choice when it comes to available space for placing the speakers.

If you are willing to spend reasonably more, but expecting modern speakers of reliable technology and non-orthodox in design approach, this is a good choice. You will also appreciate speaker's more compact design created without sacrificing audio quality.

SPECIFICATION

Recommended amplifier	30-100 W
Frequency response (± 3 dB)	50-20,000 Hz
Sensitivity (2.83V / 1m)	89 dB
Impedance	4-8 ohms
Maximum SPL	108 dB
Crossover division frequency	2.400 Hz
Tweeter	1" with soft dome
Midrange driver	1x 5½"
Cabinet type	Bass-Reflex
Speaker terminals	Single
Dimensions (H x W x D)	288 x 173 x 245 mm
Weight	3.60 kg
Finish colors	Walnut, Black
